

301Pt-S Electrode

Main Features

- High-quality platinum ORP electrode
- Suitable for all common aqueous solutions as well as wastewater treatment
- KCl gel electrolyte; no refilling required
- Compatible with all ORP meters with an 8-pin connector

Technical Parameters

Measuring range	-1999 to 1999 mV	Reference value	222 mV +/- 15 mV (25°C)
Sensor	Ø6×2,5 platinum ring	Reference system	Ag/AgCl
Junction	Single ceramic	Electrode dimensions	(Ø12×160) mm
Body material	PC (polycarbonate)	Connector	8-pin
Recommended operating temperature	(0-80)°C	Cable	1 m
