

DO500 Electrode

Main Features

- Supplied with calibration sleeve
- Integrated temperature and salinity sensors for automatic compensation
- Replaceable DO503 membrane cap (three DO503 membrane caps are included)
- Polarized and ready to measure after just 5 minutes
- Fast response: the measurement reaches 90% response within 30 seconds

Technical Parameters

Measuring range	0 to 20,00 mg/l	Response time	≤ 30 s (90% response at 25°C)
Electrode type	Polarographic	Temp. compensation range	(0 to 45) °C
Cable length	2 m	Salinity compensation range	(0 to 45) ppt
